Hi, I'm Josh Stobbs. I am currently a freelance designer and developer. I have a degree in Graphic Design and have been working in the field for three years. During my time as a working designer I have developed my skills and am confident in tackling any design problem.
Currently I am available for hire on a contract or full time basis. Below you will find more information on my history.

EXPERIENCE

FAST SIGNS
Windsor, ON
Designer & Production Specialist

While at FAST SIGNS I was trained to design for production. Creating designs that were production ready and satisfied the customer was the main goal. As well as designing for production I had to create materials on tight deadlines, production times sometimes meant that only minimal time could be spent on design. Through this I learned to be fast and efficient with what I design. In addition to design work, I was responsible for running latex printers and plotters. Using rip software to ensure optimal printing, as well as loading substrates in to the printer.

HAWKSWORTH DESIGNS
Amherstburg, ON
Design Intern

Working at Hawksworth was the first real Experience I had coming out of design school. During my time there, I learned about what it is like to create designs that are meant for more than a personal portfolio. Creating designs for customers was a new challenge. As well as that, I was introduced to new concepts of web design and development. Mainly focusing on developing using a CMS.

FREELANCE DESIGN

I have been freelancing for much of my design career.   Working for many varied clients has, naturally, led to developing quite a varied skillset. In addition to the obvious design jobs that I have had to take on, I have found myself in the role of manager, bookkeeper, and customer relations.
Much of my job as a freelancer is satisfying customers, creating solutions to all manner of problems that they bring to me.

EDUCATION

ST. CLAIR COLLEGE
Windsor, ON
Graphic Design Program

I took a three year program at St. Clair College. While there I learned the principles of design, illustration, photography, and web development. It was an intensive course that gave me the necessary skills to go out into the world as a successful designer. I graduated with an Advanced Degree in Graphic Design
